### BAR CODE RETURN (BCR) VALIDITY CHECKS FAILED

#### No bar codes were generated

These tax calculations failed the validity checks for bar codes. Therefore, no bar codes were generated and you will not be able to file this return with the CRA.

BCR validity checks relate mainly to incomplete or inconsistent data entry. Review the error and warning messages shown below and in the data editor, then make the required changes and recalculate.

The CRA imposes certain validity checks on approved software to ensure that it can process BCR's accurately and quickly. Tax returns containing BCR's that fail these checks are re-routed by the CRA to a manual assessment process which results in potential delays of several months and increased communication between the CRA and the taxpayer.

### NORTH AMERICAN INDUSTRY CLASSIFICATION SYSTEM (NAICS) CODES

The integration of NAICS codes requires corporations to pick their main revenue-generating business activity. Active corporations that file their T2 returns either by Internet or on paper using 2D bar codes must choose the most appropriate code to describe their main revenue-generating business activity.

**It is crucial that the most accurate business activity is selected the first time (using the keyword NAICS.ACT in the ACTIVITY keyword group), since the first year's code is carried forward to subsequent years, allowing for a simple validation of the description when no change in the main business activity occurs.**

**Therefore, for subsequent years, the corporation should validate that the business description chosen for the last return filed is still accurate. If the last business description is still accurate, no further action will be required. The return may be transmitted electronically or printed in barcode format.**

**If the last business description is not accurate, the corporation must select an updated business activity description.**

Should you have any questions to describe your active corporation's main revenue-generating business activity when filing your T2 return, please call the CRA Business Enquiries line at 1-800-959-5525.

### GIFI

- GIFI sch. 100 - total assets does not equal total liabilities plus shareholder equity.  
GIFI-FIELD 2599:\$31,578 (GIFI-FIELD 3499 + GIFI-FIELD 3620): \$35,166 Difference:\$3,588

## Assembling the federal T2 tax return when paper filing

When filing a tax return, the attachments should be arranged in the order in which they are processed by the department (see the appropriate order in the list below). This will accelerate processing of the returns. Also, if you are making an election, note it prominently in the relevant area of the return and schedules, or attach a note.

### Order of attachments (as per IC97-2):

- **T2 Bar Code Return** with the pages in the order DT Max prints it (this includes the GIFI component of the T2 return)

Please note that for tax years ending after December 31, 2008, corporations are no longer required to file federal **T2 RSI's** (Return and Schedule Information) when filing returns in paper form, as they are obsolete.

- Other attachments

This includes forms, eligibility certificates and other certificates or attestations which are not captured within the Bar Code Return.

If you have an election that applies to the return that is being filed:

- If the election has a prescribed form, such as Form T2054, *Election for a Capital Dividend under Subsection 83(2)*, complete a paper copy and file it separately.
- If the election does not have a prescribed form, send your notes on a separate piece of paper with the T2 Bar Code Return.

### Slips, receipts, and documents

Although all slips and receipts do not have to be sent to CRA, keep all corporation information slips, receipts, and papers for at least 6 years. CRA may ask to see them at a later date.

## **Bar Code Return (BCR) validity checks failed**

**No bar codes were generated**

**Tax return cannot be filed with CRA**

---

These tax calculations failed the validity checks for bar codes. Therefore, no bar codes were generated and you will not be able to file this return with the CRA.

The CRA imposes certain validity checks on approved software to ensure that it can process BCR's accurately and quickly. Tax returns containing BCR's that fail these checks are re-routed by the CRA to a manual assessment process which results in potential delays of several months and increased communication between the CRA and the taxpayer.

BCR validity checks relate mainly to incomplete or inconsistent data entry. Review the error and warning messages shown on the diagnostics report and in the data editor, then make the required changes and recalculate.

### **Forcing the generation of the Bar Code Return**

In a situation where you are unable to resolve all the problems encountered, you may use the keyword BCR-OV to force the generation of the Bar Code Return.

**Note however that this alternative should only be used in rare and exceptional cases.**

A tax return that fails the DT Max validity checks will also fail the CRA checks, and will therefore be delayed and re-routed to the manual assessment process.
